- Precision World National L.L.C has established in 2010 for EPC Contracting and Construction .
- All Partners are Omani technocrat
- Precision is purely local Engineering Consultant
- Omanization level is 52% (High Omanization Technical Content)
- Management are Experienced Engineers in Oil & Gas, Refinery, Oil flow lines/ pipelines, exploration and Production blocks, Plants EPC and Operations.

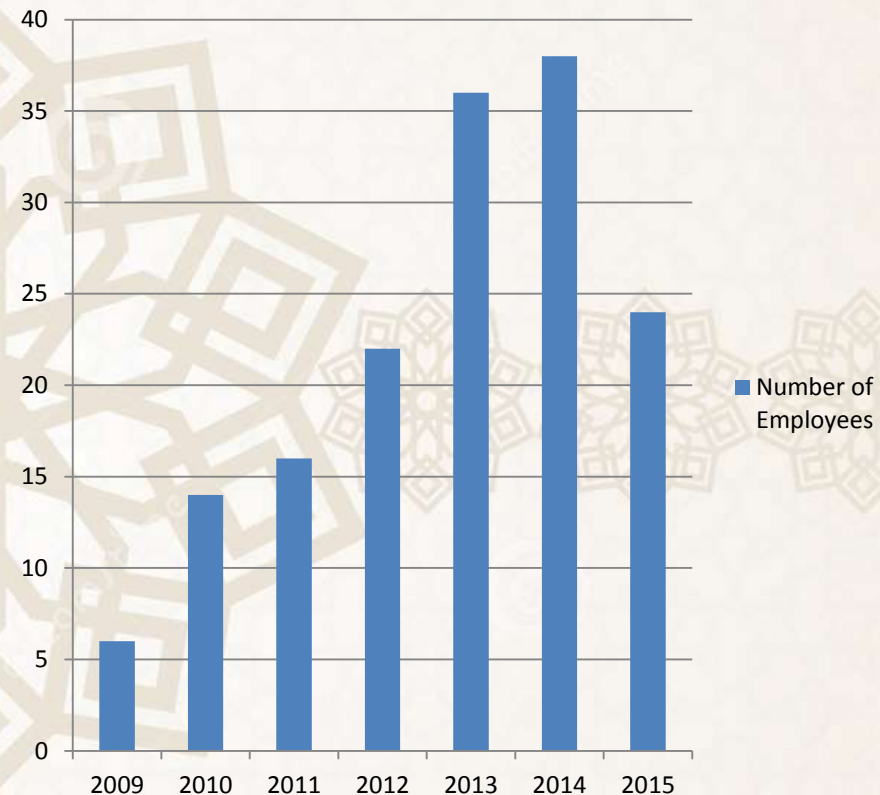

# Company Time Line and Contract Awarded

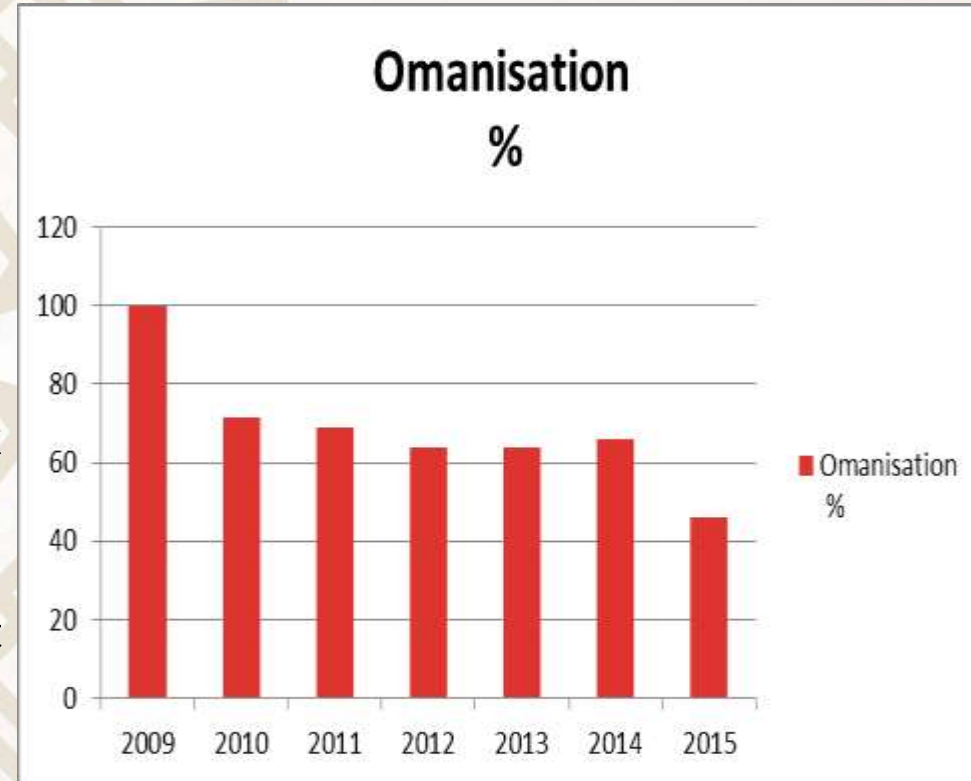

## Total Number of Employees

- ▶ This graph gives indication about the technical resources strength since 2009 till 2015.
- ▶ The company started with 6 local engineers then grown through out the years till it reached 38 people in 2014, then started declining due to oil prices drops in the international market which affected on the resources of the company and reduced the total turnover.
- ▶ The company started without taking any loans from the banks and till now it doesn't have any debits in the market but having credits with customers.

# Omanisation

- ▶ This graph shows the Omanisation percentage in the company.
- ▶ The company started with 100% and later on more expatriates have joined to increase the company technical capabilities to meet the market demand.
- ▶ Keeping high Omanisation level in the company is a challenging task since the main clients like PDO and ORPIC are offering high packages for experienced engineers, but we believe that recruiting Omani engineers and designers is a national obligation which we are following it proudly.
